

# Plant Setup & Partnership Brochure

An overview of the Grow With Us programme for prospective partners. From site assessment and setup planning to earthworm introduction, operational training and quality guidance, Urvaram helps partners establish structured vermicomposting units.

## Complete setup process

### 1. Initial Consultation

We understand the land, raw-material supply, business objective and expected production scale.

### 2. Site Assessment

The team reviews space, shade, drainage, water, access, labour and raw-material availability.

### 3. Plant Planning

A layout is prepared for pre-composting, beds, movement, screening, storage and packing.

### 4. Setup & Installation

Urvaram guides bed construction, shed planning, watering, drainage and work areas.

### 5. Earthworm Introduction

Suitable earthworms are introduced after the prepared material reaches the right condition.

### 6. Training

Partners learn raw-material management, worm care, moisture control, maturation and quality standards.

### 7. Production Support

Ongoing guidance and periodic review help maintain consistency.

## What partners get with Grow With Us

|                            |                                                                                |
|----------------------------|--------------------------------------------------------------------------------|
| <b>Structured Entry:</b>   | Start with a guided system rather than trial-and-error production.             |
| <b>Technical Training:</b> | Understand each manufacturing stage and the conditions earthworms require.     |
| <b>Quality Guidance:</b>   | Produce according to defined processing and acceptance standards.              |
| <b>Market Connection:</b>  | Access potential procurement and commercial opportunities through our network. |
| <b>Long-Term Support:</b>  | Continue receiving technical and quality guidance beyond the initial setup.    |
